CALL FOR POSTERS AND DEMONSTRATIONS

21st International Conference on
INFORMATION SYSTEMS FOR CRISIS RESPONSE AND MANAGEMENT

"Theme: Embracing the Crisis Management Lifecycle"

Conference May 25th-29th, 2024

Münster - Germany

University of Münster and State Fire Service Institute North Rhine-Westphalia
https://iscram2024.ercis.org/

INTRODUCTION

On behalf of the ISCRAM 2024 Conference Committee, we take great pleasure in inviting you to submit a proposal for Posters & Demonstrations application. We would like to welcome you to showcase your work to an international and focused group of ISCRAM researchers and practitioners while enjoying the city of Münster!

TOPICS OF INTEREST

ISCRAM 2024 takes a process-centric view on crisis management and emphasizes a holistic and integrated process view of crisis management to overcome isolated considerations of crisis management lifecycle phases. We would like to carry forward the conference's vision of a "pracademic" approach and come together in a poster & demonstration session to showcase practitioners' and academic work, exchange ideas and find new ways for future collaboration.

By demonstration, we mean the demonstration of instruments, procedures, training scenarios or tools. The demonstration serves to inform the participants by showing those without actually applying them in the form of tutorials etc.

In the light of this year's theme "Embracing the Crisis Management Lifecycle", posters and demos that are associated with the following topics (in alphabetical order) are particularly welcome:

- Case Studies and real-life experiences
- Collaborative and intelligent systems
- Community emergency response teams
- Community resilience
- Crisis planning, training and gaming
- Data integration, representation, and visualization
- Decision support systems
- Display of operating procedures
- Emergency response systems
- Information and communication technologies
- Process modelling and management
- Public-private partnership and practitioner-academic collaboration
- Showcases of crisis management operations
- Specific tools, technologies, software, hardware, etc., that can be demonstrated

SUBMISSION AND EVALUATION

Poster authors and demonstrators are invited to submit proposals for posters or demonstrations using the following template: Link to template.

The submissions must be formatted according to the template and contain a short abstract, describing the content of the poster/demonstration as well as information about the presenting author or demonstrator. It should also include information on your past experience regarding crisis response and management.

Submissions need to be done in a PDF format via the Easychair service for ISCRAM: Submission via EasyChair. Within EasyChair, please remember to choose "Track 18: Poster Proposal Submission" as the category of submission. (For those unfamiliar with EasyChair, you will need to register and open a free account).

All submissions will be reviewed by the track chairs, who will notify authors/demonstrators on whether they are accepted to present at the ISCRAM 2024 conference. Please, note that it is not necessary to submit the complete poster/demonstration. All authors/demonstrators accepted for the conference will be contacted with further information on display procedures and upload deadlines.

IMPORTANT DATES

- Submission Deadline: February 15th 2024
- Notification of Acceptance: March 15th 2024

DISPLAY PROCEDURES AT THE CONFERENCE

Once accepted, authors and demonstrators will be informed about the guidelines for their posters or demonstrations. This section of the call will be updated accordingly.
