

CALL FOR WORKSHOPS AND TUTORIALS

21st International Conference on
INFORMATION SYSTEMS FOR CRISIS RESPONSE AND MANAGEMENT

*“Theme: Embracing the Crisis Management
Lifecycle”*

Conference May 25th-29th, 2024

Münster - Germany

University of Münster and State Fire Service Institute North Rhine-Westphalia
<https://iscram2024.ercis.org/>

INTRODUCTION

On behalf of the ISCRAM 2024 Conference Committee, we take great pleasure in inviting you to submit a proposal for Workshops & Tutorials. We invite you to present and discuss ideas, methods and tools in an engaging workshop or tutorial together with an international and dedicated community of ISCRAM researchers and practitioners, all set against the backdrop of the charming city of Münster!

PROPOSAL INSTRUCTIONS

- Please prepare a short abstract (500 words) where you motivate the topic and describe what you are planning to do in the workshop/tutorial. The abstract will be included in the conference proceedings. Furthermore, please add a statement about your experience with the topic and similar sessions.
- Schedule a workshop/training course lasting about 2-4 hours. Ensure to incorporate breaks for the extended sessions. Longer sessions are also possible, but have to be consulted with the chairs.
- Please use the **Workshop Proposal Template** and submit the proposal via email to iscram2024@ercis.org by **February 28th, 2024**: [Link to the template](#).
- If possible, it is recommended to relate your workshop or tutorial to the overall theme of this year's ISCRAM: “Theme: Embracing the Crisis Management Lifecycle” if relevant.
- As we strive to embrace the idea of “pracademics”, workshops and tutorials co-hosted by academics and practitioners are well appreciated.

POTENTIAL CONTRIBUTIONS

The aim of the workshops and tutorials is to allow researchers, technologists, practitioners, and funding agency representatives, to interact, learn, and discuss specific, emerging topics for crisis management, including methodologies, software, and other related technologies. Possible contributions include the following (other ideas are also welcome):

Type	Description
1. Hands-on session for techniques for crisis management	<ul style="list-style-type: none">• Specific technical advancements and emerging technologies for preparation, response, recovery and mitigation in crisis management• New ways of applying existing technologies for crisis management• Innovative/applied research methodologies for crisis management• Software tutorials used in crisis management or modelling• Requirement: should engage participants
2. Practitioner-researcher task co-design and validation session	<ul style="list-style-type: none">• Personalized rapid prototyping and evaluation with the help of practitioners
3. Dialogue between practitioners and researchers	<ul style="list-style-type: none">• Dialogue between practitioners and researchers on specific topics, focused on the information needs of responders in various scenarios
4. Research grant accountability and practical research impact	<ul style="list-style-type: none">• Different government agencies interested in accountability and evaluation processes for research on crisis management
5. Other	<ul style="list-style-type: none">• Topics and formats that are not listed here but are appropriate for ISCRAM and that would potentially generate interest from ISCRAM members
